**2314 Helicobacter pylori Stool Antigen - Stool**  
*Methodology - EIA*

### Helicobacter pylori Stool Antigen

	Result	Expected Result
HpSA - H. pylori	Negative	Negative

### Commentary

Commentary is provided to the practitioner for educational purposes, and should not be interpreted as diagnostic or as treatment recommendations. Diagnosis and treatment decisions are the practitioner's responsibility.

The performance characteristics have been verified for assays performed by Genova Diagnostics, Inc. This assay has been cleared by the U.S. Food and Drug Administration.

Helicobacter pylori is a bacterium which causes peptic ulcer disease and plays a role in the development of gastric cancer. Direct stool testing of the antigen (HpSA) is highly accurate for diagnosis and follow-up of infection.
