Patient: FEMALE
TEST
DOB: Sex: MRN:

Oxidative Stress 2.0 (Urine)

Please note the reference range for 8-OHdG (urine) has been updated.

Methodology: LC/MS/MS, Alkaline Picrate, thiobarbituric acid reactive substances (TBARS), Hexokinase/G-6-PDH

The performance characteristics of all assays have been verified by Genova Diagnostics, Inc. Unless otherwise noted with *, the assay has not been cleared by the U.S. Food and Drug Administration.

One Standard Deviation (1 S.D.) is a statistical interval representing 68% of the reference population. Values between 1 and 2 S.D. are not necessarily abnormal. Clinical correlation is suggested. (See example below)
